

ECE 421 Project 1

Stock Project Monitor

Arun Woosaree
Alexander Rostron
Jacob Reckhard

January 30, 2020

1 Rationale

2 Testing

3 Defects

The biggest fault of the program is that there is an API key limitation in that it can only get 5 stock prices every minute. This is problematic, because there is 10 stocks the program is to check. This mean it cannot work faster then a minute.
